

```
import java.swing.JFrame;
public class Mainwindow {
//constructor for frame
public Mainwindow(String title) {
JFrame frame = new JFrame();
frame.setSize(640,480);
frame.setTitle(title);
frame.setDefaultCloseOperation(JFrame.EXIT_ON_
CLOSE);
//and our shape !
Shape shape = new Shape(100, 200);
frame.add(shape);
frame.setVisible(true);
}
public static void main(String[] args) {
new MainWindow("WINDOW");
}
}
```
